AIDS

Issued by Russia on November 25, 1993 for the Prevention of AIDS

Acquired Immunodeficiency Syndrome (AIDS)

In 1981, the following two reports, from the Centers for Disease Control, appeared less than one month apart, in their weekly bulletin MMWR (Morbidity and Mortality Weekly Report):

***Pneumocystis* Pneumonia—Los Angeles**

"In the period October 1980—May 1981, 5 young men, all active homosexuals, were treated for biopsy confirmed *Pneumocystis carinii* pneumonia at 3 different hospitals in Los Angeles, California. Two of the patients died. All 5 patients had laboratory-confirmed previous or current cytomegalovirus infection and candidal mucosal infection..."

MMWR June 5, 1981;30: 250-252

Kaposi's Sacroma and *Pneumocystis* Pneumonia Among Homosexual Men—New York City and California

"During the past 30 months, Kaposi's sarcoma (KS), an uncommonly reported malignancy in the United States, has been diagnosed in 26 homosexual men (20 in New York City [NYC]; 6 in California). The 26 patients range in age from 26-51 years (mean 39 years). Eight of these patients died (7 in NYC, 1 in California)—all 8 within 24 months after KS was diagnosed..."

"Seven KS patients had serious infections diagnosed after their initial physician visit. Six patients had pneumonia (4 biopsy confirmed as due to *Pneumocystis carinii* (PC), and one had necrotizing toxoplasmosis of the central nervous system. One of the patients with *Pneumocystis* pneumonia also experienced severe, recurrent, herpes simplex infection; extensive candidiasis; and cryptococcal meningitis..."

MMWR July 3, 1981;30:305-308

And so it began!

PHILATELISTISCHES WHO IS WHO VON 160 ÄRZTEN
PHILATELIC WHO IS WHO OF 160 PHYSICIANS
